CONTENTS

Volume 2, Issue Nos 1–4

INTERNATIONAL JOURNAL OF OPTICAL COMPUTING

Issue No. 1, April 1991

Editorial: J. A. Neff 1

Waveguide Holograms in Optical Computing: V. N. Morozov and A. N. Putilin 3

Optoelectronic, Multivalued, Conservative Logic: P. D. Picton 19

Optical Multicasting in Linear Arrays: C. Qiao, R. G. Melhem, D. M. Chiarulli and S. P. Levitan 31

Massively Parallel Optical PLA: S. A. Kupiec and H. J. Caulfield 49

Issue No. 2, July 1991

Comparative Study of Various Optical Filters for Edge Enhancement: F. Christnacher and H. Royer 63

Parallel Optical Processors—Some Basic Considerations: J. Shamir and H. J. Caulfield 73

Fringe Shifting of Phase-coupled Array Lasers for Optical Logic Operations: H. Itoh, S. Mukai, F. Sauer, M. Watanabe and H. Yajima 89

Characterization of Optically Addressed SLMs for Recurrent Optical Neural Networks: N. Collings and W. Xue 97

Issue No. 3, October 1991

Special Issue: Photorefractive Materials
Guest Editors: Pochi Yeh and Jean-Pierre Huignard

Editorial 109

Photorefractive Image Processing using Compound Semiconductors: L.-J. Cheng, D. T H. Liu and K. L. Luke 111

Applications of Photorefractive Crystals to Signal Processing: F. T. S. Yu and S. Yin 143

Photorefractive Crossbar Interconnect: A. Chiou and P. Yeh 165

Indexed or abstracted by 'Cambridge Scientific Abstracts' and 'Compuscience Database'.

Photorefractive Holographic Memories with Dynamic Copying: Y. Qiao and D. Psaltis. 185

Optical Implementation of Back-propagation Neural Networks using Cascaded-grating Holography: Y. Owechko 201

Signal Processing and Adaptive Filtering using a Photorefractive Square Law Converter: F. Vachss, J. Hong, C. Keefer and J. Malowicki 233

Two-wave Mixing in Sillenite Crystals for Arbitrary Grating Vectors: Polarization Effects: H. C. Ellin, M. V. Shamonin and L. Solymar 239

Self-aligned Holographic Interconnects between Single-mode Fibres with Mutually Pumped Phase Conjugate Mirrors: N. Wolffer, V. Vieux, V. Royer, G. Picoli and P. Gravey. 245

All-optical Image Association using a Photorefractive Crystal and a Nematic Liquid Crystal with Optical Feedback: M. Duelli, M. Ingold, P. Günter and M. Schadt 259

New Advances in Photorefractive Holographic Memories: G. Pauliat and G. Roosen. 271

Application of Interferometry with Phase Conjugation for Flame Diagnostics: H. J. Tiziani, J. Schmidt and P. Kasal 293

GENERAL SECTION

A General-purpose Residue Arithmetic Processor: L. E. M. Brackenbury and M. R. Laker 299

Issue No. 4, December 1991

Special Issue: Optical Image Processing
Guest Editors: Gerd Häusler and Leonid Yaroslavsky

Editorial 315

Ferroelectric Liquid Crystal Light Valves: Application to Parallel Information Processing: J. L. de Bougrenet de la Tocnaye 319

Some Filters for Reliable Recognition and Localization of Objects by Optical Correlators: a Comparison: J. Campos, F. Turon, L. P. Yaroslavsky and M. J. Yzuel 341

Nonlinear Image Processing Based on Optical-digital Method of Local Histogram Calculation: V. Kober, J. Garcia, T. Szoplik and L. P. Yaroslavsky 367

A Self-organizing Network for Vector Quantization of Spectral Images: T. Inoue, K. Yamatani, K. Itoh and Y. Ichioka 385

Optical Neural Networks Based on Error Back-propagation Learning for Hetro-association of Two-dimensional Patterns: S.-W. Yuk, H.-J. Lee, S. Y. Lee and S.-Y. Shin 397

An Optical Neural Network for Pattern Recognition: K. Y. Hsu, S.-H. Lin, C.-J. Cheng, T.-C. Hsieh and P. Yeh 409

Neural Nets with Reduced Connectivity for the Processing of Large Pictures: W. Gloger and G. Häusler 425

GENERAL SECTION

The Double Heterostructure Optical Thyristor in Optical Information Processing Applications: M. Kuijk, P. Heremans, R. Vounckx and G. Borghs 433
